Buffalo State College, State University of New York New Technology Building Buffalo, New York

LF Engineering is providing the structural design and engineering for the new Technology Building at Buffalo State College. LF Engineering is a part of the design team and will follow the project from conceptual design through building occupation.

The new Technology Building will house the departments of Technology and Computer Information Systems, and provide classrooms, research spaces, student computer labs, and faculty office space. The building is three stories and includes an open, two-story, atrium in the center of the structure as well as several two-story technology labs. The building is approximately 87,000 square feet, with a construction budget of 27 million dollars.

Construction is scheduled to begin in 2011, with completion in June 2013.
