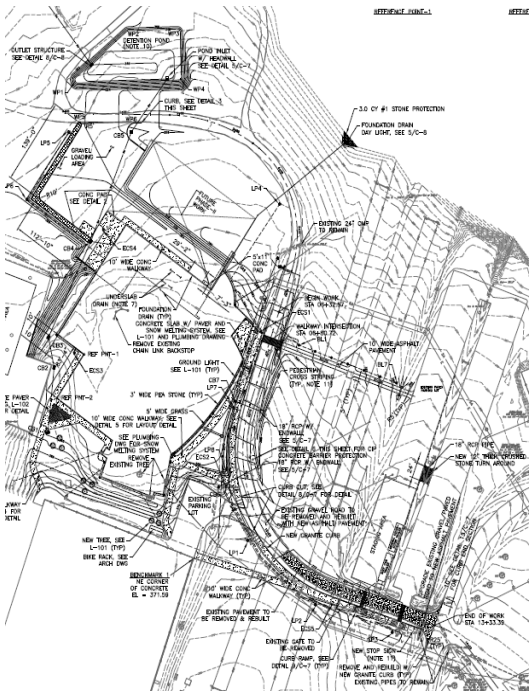
State University of New York at Canton
Convocation, Athletic Recreation Center (CARC)
Canton, New York

The $40 million SUNY Canton CARC project involves the construction of a new sport and recreation facility. Included within the facility is a new field house and ice hockey rink. It is a full service A/E project with site civil and utility work, building architectural and structural design, mechanical and electrical services, communication, security and other campus required services. L F Engineering is the civil engineer on the design team responsible for all site utility work including power supply, water supply, sanitary sewer, telephone and communication, and campus security. L F Engineering is also responsible for all civil services including site planning, roads and walkways, grading, erosion and sedimentation pollution control, storm water management, SPEDS permit, etc.



The services provided by L F Engineering cover all phases of the project from schematic design, design development, design manual, through construction services to project completion.
